NFT Generator

Tools for creating your next digital masterpiece.

NFT Marketplace

Browse, buy, sell and auction your NFTs.

NFT Trading

Easily swap NFTs with other collectors.

Multi-Chain

HeroVerse is a multi-chain protocol, compatible with all the top smart contract chains.

HRV Tokenomics

HRV is the native utility token of HeroVerse and is used for governance, fees, staking and NFT giveaways. HeroVerse was launched on Sept 25, 2022 with total supply of 100,000,000 HRV tokens.

HeroVerse (HRV) is a cryptocurrency token that runs on the Binance Smart Chain blockchain. Its network is protected by the proof-of-stake (PoS) consensus mechanism DPOS.

The total supply of HRV tokens is allocated as follows:
- **25%** Staking
- **25%** Airdrop & Presale
- **25%** Locked Liquidity
- **10%** NFT Drops
- **10%** Founders (Locked for 5 years)
- **5%** Marketing

Exchange Listing: HeroVerse will be listed on the following exchanges:
- **Pancakeswap:** Nov, 2022
- **MexC:** Nov 2022
- **LAToken:** Nov, 2022
- **CMC & CG:** Dec 2022

Background

HeroVerse is a cross-chain decentralized finance (DeFi) protocol built to facilitate the launching of new non-fungible tokens (NFTs) without the need for programming. A marketplace and an innovative set of tools allow any project to deploy a farm with its own rules.
